

Materials:

- 1 Paper Plate
- Scissors
- Paint - Green and 1 Other Color
- Colored Pencil for Drawing
- Construction Paper
- Craft Glue
- Markers
- 1 Raw Bowtie Noodle
- Googly Eyes (optional)
- Scotch Tape (optional)

Directions:

First, create Sloth.

- Cut a paper plate in half and cut out the border on one half of the plate. This is Sloth's body.
- On the piece of the plate that remained after the border was cut off, draw a circle. Cut out the circle. This is Sloth's head.
- Paint the head and body any color that you like. Add some green paint on the edge of the body for algae.
- When the paint is dry, draw the face on the circle. Draw in the “racoon-like” part that goes around Sloth's eyes and glue on googly eyes or draw eyes with a magic marker.
- Cut a 2” strip of construction paper to use as the branch and, using a different color construction paper, cut out some leaves. Tape or paste the leaves onto the branch.
- Draw 2 or 3 toes on both of Sloth's feet and then tape Sloth's feet onto the branch.
- Tape on Sloth's head.

Next, create Moth

With a magic marker, color an uncooked bow tie shaped pasta noodle. This is Moth!

Finally, put it all together!

Glue the noodle onto Sloth's body.

Moth & Sloth are together again. Best Friends Forever!
